TABLE OF CONTENTS FOR  
"OPERATION OF BLAST FURNACE AIR BLOWERS"

V. F. R18

This 216-page book gives the characteristics of air blowers and describes conditions of their operation and methods for their industrial testing and control. The author also suggests a method for evaluating the performance of air-blowing equipment and discusses possible structural modifications of existing machines for increasing their efficiency. The book is for engineers of metallurgical plants, designers, and students of higher technical schools.

## Table of Contents

## Page

I.	Characteristics of Air Blowers	20
II.	Performance of Air Blowers Servicing the Blast Furnace	51
III.	Influence of the Air Section	68
IV.	Evaluating Operational Efficiency of Equipment	80
V.	Methods of Measuring Basic Values	92
VI.	Experimental Determination of Characteristics of Air Blowers	129
VII.	Technical Control and Recording of Performance of Equipment	146
VIII.	Methods for Rationalization of Blower Section Through Which Air Passes (Rotor and Stator)	155
IX.	Comments on Operation of Air Blowers	171
